EROSION OF SOIL AROUND BARREL CONTAINING RADIOACTIVE MATERIALS AT THE OLD
LANDFILL

DOE, RFO CORRESPONDENCE (7183)

In response to your memorandum dated July 16, 1990, please note that we did respond as requested to your June 7, 1990 memorandum. In our response dated June 22, 1990 (attached), we determined that the barrel should not be removed, however, the area should be fenced off and action taken to cover it with gravel and clean fill.

As of July 18, 1990 the areas of concern in the old landfill have been roped off and warning signs posted. The Environmental Restoration Department is preparing a work plan to place approximately 2,500 tons of clean fill dirt over the areas affected by erosion.

Pursuant to a discussion that T C Greengard had with M Hestmark of the EPA on July 18, no action to place the dirt is to be taken before July 27, 1990, when we will meet with the EPA to discuss the possible alternatives. T C Greengard briefed R Schassburger of your staff on July 18 on our actions and his conversation with the EPA.

If you have any questions, please contact Tom Greengard at X7121
